

Planning Logic

Import Data using Transform Maps (Spreadsheet) – ServiceNow

Key Terms

Sprint: A fixed period or duration in which a team works to complete a set of tasks.

Epic: A big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

Story: A small task that is part of an Epic.

Story Point: A number that represents how much effort a story takes to complete (usually in the form of the Fibonacci series).

Story Point Scale (1, 2, 3, 5)

Story Points	Meaning
1	Very easy task
2	Normal task
3	Moderate task
5	Difficult task

Sprint 1

Data Preparation (Epic 1)

- Prepare employee data in Google Sheet and download as .xlsx (USN1) – 2

Table Setup (Epic 2)

- Create custom table Employee Test, u_employee_test (USN2) – 2

Data Import (Epic 3)

- Load data into import set table u_employee_import (USN3) – 2
- Create Transform Map and map fields (USN4) – 3
- Run transform and validate 15 records (USN5) – 3

Total Story Points in Sprint 1 = 2 + 2 + 2 + 3 + 3 = 12

Sprint 2

Duplicate Handling (Epic 4)

- Enable Coalesce on Employee ID (USN6) – 3
- Import updated data and verify in Transform History (USN7) – 3

Reports (Epic 5)

- Employees by Department – Pie Chart (USN8) – 2
- Employees by Location – Bar Chart (USN9) – 2
- Employee List Report (USN10) – 1

Dashboard (Epic 6)

- Create Employee Analytics Dashboard (USN11) – 3
- Add reports to dashboard and share (USN12) – 2

Total Story Points in Sprint 2 = 3 + 3 + 2 + 2 + 1 + 3 + 2 = 16

Total Story Points

Sprint 1 = 12

Sprint 2 = 16

Total Story Points = 12 + 16 = 28

Number of Sprints = 2

Velocity

Velocity = Total Story Points Completed / Number of Sprints

Velocity = 28 / 2 = 14 (Story Points per Sprint)

The team's velocity is 14 Story Points per Sprint.

Average velocity per day (6-day sprint) = 14 / 6 $\approx$ 2.33 story points per day.
