

User Acceptance Testing (UAT) Template

Date	03 Oct. 26
Team ID	SWTID-2026-8365
Project Name	Import Data using Transform Maps (Spreadsheet) – ServiceNow
Maximum Marks	

Project Overview:

Project Name: Import Data using Transform Maps (Spreadsheet) – ServiceNow

Project Description: Imports bulk employee data from an Excel spreadsheet into ServiceNow using an Import Set (staging table u_employee_import) and a Transform Map into the custom table Employee Test (u_employee_test). Coalesce on Employee ID prevents duplicates, and three reports are shown on the Employee Analytics Dashboard.

Project Version: 1.0

Testing Period: 19 Jan 2026 to 31 Jan 2026

Testing Scope:

Features and functionalities tested: custom table creation, Load Data (Import Set), Transform Map field mapping and transformation, Coalesce on Employee ID, Transform History validation, reports (Employees by Department, Employees by Location, Employee List) and the Employee Analytics Dashboard.

User stories tested: USN-1 to USN-12 of the Project Planning template (data preparation, table setup, data import, duplicate handling, reports and dashboard).

Testing Environment:

URL/Location: ServiceNow instance (Global application scope)

Credentials (if required): Administrator account (not recorded in this document)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create custom table Employee Test	1. Go to Tables > Create New 2. Label: Employee Test, Name: u_employee_test 3. Add Employee ID, Employee Name, Email, Department, Location (String)	Table is created and the form shows all five fields	Table created; all five fields are displayed on the form	Pass

TC-002	Load spreadsheet into a new Import Set table	1. Open Load Data 2. Label: Employee Import 3. Choose Sample Spreadsheet.xlsx (sheet 1, header row 1) and Submit	Staging table u_employ ee_import is created and all rows are loaded	Complete / Success: Processed 15, inserts 15, errors 0	Pass
TC-003	Create Transform Map and map fields	1. Click Create Transform Map 2. Source: Employee Import, Target: Employee Test 3. Use Auto Map Matching Fields / Mapping Assist and Save	All five source fields are mapped to target fields	Field Maps (5) created: name, employee _id, department, location, email	Pass
TC-004	Run the transform	1. Open the Transform Map and click Transform 2. Select the import set and click Transform 3. Open Employee Tests	Transformation completes and 15 records exist in Employee Test	Complete / Success; 15 records shown (1 to 15 of 15)	Pass
TC-005	Coalesce updates existing records and inserts new ones	1. Set Coalesce true on Employee ID 2. Load updated sheet (4 rows) into the existing table 3. Run Transform and open Transform History	2 changed rows are updated and 2 new rows are inserted	Total 4, Inserts 2, Updates 2, Errors 0; SB-0004 name changed to Ajay, SB-0010 email changed to test18@gmail.com	Pass
TC-006	Negative: re-import the same sheet	1. Load the same updated sheet again into the same table 2. Run Transform 3. Check Transform History	No duplicate records are created	Total 4, Inserts 0, Updates 0, Ignored 4	Pass

	(duplicate check)				
TC-007	Report: Employees by Department	1. Reports > New, table Employee Test 2. Type: Pie chart, Group by Department, Aggregation Count 3. Run and Save	Pie chart shows employee count per department	ServiceNow 11 (64.71%), Salesforce 4 (23.53%), Aimpl 2 (11.76%)	Pass
TC-008	Report: Employees by Location	1. Create a new report on Employee Test 2. Type: Bar chart, Group by Location, Aggregation Count 3. Run and Save	Bar chart shows employee count per location	Bar chart shows Hyderabad and Chennai counts	Pass
TC-009	Report: Employee List	1. Create a new report on Employee Test 2. Type: List, select the five columns 3. Run and Save	List shows all employee records with the five columns	List shows all 17 records (1 to 17 of 17)	Pass
TC-010	Create Employee Analytics Dashboard	1. Enable Admin Overrides on the pa_dashboards create ACL and Update 2. Open PA_DASHBOARDS.FORM 3. Name: Employee Analytics Dashboard and Save	Dashboard is created	Dashboard created and listed as an option in Add to Dashboard	Pass
TC-011	Add the three reports to the dashboard	1. Open each report > Share > Add to Dashboard 2. Choose Employee Analytics Dashboard and click Add	All three reports appear on the dashboard	Employee List, Employees by Location and Employees by Department are shown on	Pass

				the dashboard	
--	--	--	--	---------------	--

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Department value shows different letter case for updated records	1. Import the updated sheet and run the transform 2. Open Employee Tests 3. Check Department for SB-0004 and SB-0010	Low	Open	Shows 'Servicenow' instead of 'ServiceNow'; the department report still groups them correctly. Standardize the source data or add a transform script to normalize case.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
